

1.2 The main landforms associated with these processes

UNDERSTAND THESE TERMS

- Alluvium
- Delta
- Floodplain
- Gorge
- Rapids
- Levee
- Oxbow lake
- Waterfall

« RECALL AND CONNECT 1 «

River processes and landforms are very similar to coastal processes and landforms. See if you can answer the following questions, linked to [Topic 2, 'Coastal environments'](#).

- a Name two coastal landforms of erosion.
- b Explain how concordant coastlines differ from discordant coastlines.

- 1 Explain how waterfalls are formed, using labelled diagrams to support your answer.

2 Which of the following landforms are found in the upper course of a river?

- waterfall
- oxbow lake
- floodplain
- rapids
- delta
- gorge

3 How do levees form?

For questions that use the command word 'compare', you should identify or comment on similarities and/or differences. Carefully read the question to understand what two or more things you are being asked to compare. 'Compare' questions are commonly shorter response questions. You should look at the number of marks available to help you to decide roughly how much to write.

4 Compare the features of rapids and waterfalls. [3]

5 Figure 1.3 shows a cross-section of a river meander. Compare the outside of the meander (A) with the inside of the meander (B). [3]

Figure 1.3: A cross-section through a meander bend in a river

Figures 1.4 and 1.5 show two sections of the River Dove as it flows through Derbyshire and Staffordshire in the UK. Compare the characteristics of the river and its valley in the two locations. [3]

Figure 1.4: The River Dove at Milldale, Derbyshire

Figure 1.5: The River Dove at Fauld, Staffordshire
