

1.3 Rivers present opportunities and hazards for people

- 1 List three opportunities that rivers can provide.
- 2 How can agriculture contribute to river pollution?
- 3 Name one human cause of flooding and one natural cause of flooding.

Attempt the questions below to practise answering both 'explain' and 'compare' questions. Remember that each command word requires a different approach. Consider the command word carefully when answering, rather than focusing solely on the topic content.

- 4 Compare the impacts on people of river flooding and pollution. [6]
- 5 Explain the economic impacts of flooding. [4]
- 6 Compare the effectiveness of hard engineering and soft engineering techniques used in the management of flooding. [6]
- 7 Explain how afforestation can help to prevent river flooding. [3]

REFLECTION

How well do you know your detailed specific examples? Do you struggle to remember facts about different places? Sometimes it helps to annotate maps of places to show where different events have taken place. For example, you can annotate a map of a river to show where the human and natural causes of flooding originated. Seeing this information on a map can sometimes help you to understand places that you may not have visited before.

Does this technique help you to understand detailed specific examples?

« RECALL AND CONNECT 2 «

Rivers can be a useful resource. They are frequently used in the generation of energy. See if you can answer this question about rivers as a resource, linked to [Topic 10, 'Resource provision'](#).

- a** How does hydroelectric power (HEP) use rivers to generate electricity?
- b** Is HEP a renewable or non-renewable source of energy? Explain your answer.

SELF-ASSESSMENT CHECKLIST

Let's revisit the knowledge focus and exam skills focus for this topic.

Decide how confident you are with each statement.

Now I can	Show it	Needs more work	Almost there	Confident to move on
Explain the features and processes of drainage basins	Define watershed, confluence, tributary, source and mouth.			
Explain the different river processes	How are the processes of erosion, transportation and deposition connected in a river system?			
Describe the landforms that are found in different stages of a river and explain how they are formed	List two landforms found in the upper, middle and lower courses of a river.			

Now I can	Show it	Needs more work	Almost there	Confident to move on
Understand the hazards and opportunities that rivers provide	With reference to rivers, give two examples of hazards and two examples of opportunities.			
Understand the command word 'explain'	Answer an 'explain' question confidently, such as 'Explain how waterfalls form.'			
Understand the command word 'compare'	Answer a 'compare' question confidently, such as 'Compare the upper and lower courses of a river.'			
Understand what command words are	Describe the difference between an 'explain' question and a			

Now I can	Show it	Needs more work	Almost there	Confident to move on
	'compare' question.
