

10.1 How food is produced

- ~~1~~ What are the three types of farming?
- ~~2~~ What are the differences between the three types of farming?
- ~~3~~ What are the two systems of farming?

When answering 'give' questions, ensure that you read the question carefully to identify what it is asking. It may be a one-word answer or a short sentence. It might be testing your recall skills or the use of a resource.

- ~~4~~ Give a physical input for a farming system. [1]
- ~~5~~ Give **two** differences between commercial farming and subsistence farming. [2]

Figure 10.1: A flow diagram of a farming system

► **Image Description**

Study Figure 10.1, which is a flow diagram showing the inputs, processes and outputs of farming systems. Using a copy of the diagram and then answer the following questions (see [Topic 10](#) in the Resource Sheets).

- a** Add three capital inputs.

- b** Add four processes that arable farming could use.

UNDERSTAND THESE TERMS

- Inputs
- Processes
- Outputs
- Aeroponics
- Aquaponics
- Hydroponics
- Arable farming
- Commercial farming
- Subsistence farming

90

7 Complete the sentences below.

- a** Aeroponics is _____ .
- b** Aquaponics is _____ .
- c** Hydroponics is _____ .

REFLECTION

Aeroponics, hydroponics and aquaponics are all very similar sounding words. Do you have any strategies to help you remember the difference between them? For example, you could link the first part of aeroponics, 'aero', to the word 'aeroplanes' (which travel through the air) to help you remember that aeroponics is a technique of growing plants with their root

systems suspended in air. Can you think of similar ideas for aquaponics and hydroponics?
