

10.2 The global patterns of food supply and demand

1 Table 10.1 includes strategies to meet food demand as well as their purposes.

irrigation	provides water to dry areas	increases crop resistance and yields
improves efficiency in farming	genetically modified crops	agricultural machinery

Table 10.1: Strategies to meet food demand and their purposes

- a** Sort Table 10.1 into two columns: 'strategies for increasing food demand' and 'purposes'.
- b** Match the strategy with its purpose.

2 What does the 'globalisation of food supplies' mean?

When you are asked to justify, you need to support your answer with clear reasons and evidence. This means explaining why a certain viewpoint or decision is valid, often by using your own knowledge or information from the question. Test your ability to justify by answering the questions below.

3 Justify the use of genetically modified (GM) crops to increase food supply.

[3]

Figure 10.2 shows the daily supply of calories per person in 2018.

Figure 10.2: Daily supply of calories per person (2018)

Justify how increasing food production can help meet global demand.

[3]

UNDERSTAND THESE TERMS

- Globalisation of food supplies
- Genetically modified (GM) crops
