

2.3 Coasts present opportunities and hazards for people

<< RECALL AND CONNECT 2 <<

Hazardous environments like coasts can provide both opportunities and hazards for people. Answer the questions below to test your understanding of [Topic 4, 'Tectonic hazards'](#), which represents another hazardous environment.

- a** What are the economic benefits of living near a volcano?
- b** Name three scales that are used to measure earthquakes.
- c** What is a lahar?
- d** Draw a labelled diagram to show the main features of a cinder cone volcano.

1 Copy and complete Tables 2.1 and 2.2.

Hard engineering technique	Description	Advantage	Disadvantage	Lev sus
Sea wall				
Groynes				

Table 2.1: Hard engineering techniques

Soft engineering technique	Description	Advantage	Disadvantage	Level of sustainability
Beach nourishment				
Managed retreat				

Table 2.2: Soft engineering techniques

- 2 Decide if the following statements are true or false.
 - a Rising sea levels can lead to increased flooding in coastal areas.
 - b Tourism always has a negative impact on coastal environments.
 - c Coastal defences can help reduce the risk of erosion and flooding.
 - d Living near the coast offers no economic benefits.
- 3 What is coral bleaching?
- 4 What are some threats to mangroves?

Keeping to time is really important in your exam. If you do not manage your time properly, you may miss out questions. If you don't give an answer to a question, you won't get any marks for that question. Before you answer a question, work out how long you should spend on it – remember that you should aim to spend between 1–1.5 minutes per mark.

Decide how long you should spend answering the following questions, and then time yourself answering the questions.

~~5~~ Describe **three** impacts of a tropical storm. [3]

~~6~~ Study Figure 2.3. Describe the distribution of coral reefs. [3]

Figure 2.3: The global distribution of coral reefs

~~7~~ Describe **two** opportunities of living near the coast. [4]

~~8~~ Using an example you have studied, describe the impacts of a tropical storm. [7]

REFLECTION

How did you find answering the questions within a set time? Did you have enough time to answer the questions? Is there anything you can do differently next time to keep your answers on time?

UNDERSTAND THESE TERMS

- Hard engineering
- Soft engineering
- Coral bleaching

SELF-ASSESSMENT CHECKLIST

Let's revisit the knowledge focus and exam skills focus for this topic.

Decide how confident you are with each statement.

Now I can	Show it	Needs more work	Almost there	Confident to move on
Explain how physical processes shape the coast	Explain how the process of hydraulic action erodes sea cliffs.			
Describe the characteristics and explain the formation of coastal landforms	Explain how the process of longshore drift can lead to the formation of coastal spits.			
Identify opportunities and challenges of living near coasts	Identify three opportunities and three challenges of living near the coast.			
Understand the command word 'describe'	Answer a 'describe' question			

Now I can	Show it	Needs more work	Almost there	Confident to move on
	confidently, such as 'Describe a discordant coastline.'			
Recognise that I need to keep to time in my exam	Answer this question in one minute: 'Give one characteristic of a constructive wave.' [1]
