

3.4 Threats to tropical rainforest ecosystems and how they can be managed

- 1 What resources from tropical rainforests do humans use?
- 2 Use the statements in Table 3.3 to create a flow diagram showing how soil erosion takes place in tropical rainforests.

soil is no longer protected from heavy rain
vegetation is removed
plants are not able to grow
soil erodes, or washes away

Table 3.3: The process of soil erosion

There are a range of question types. Recognising different types of question allows you to tailor your answer accordingly. For example, multiple-choice questions require you to choose the most accurate and relevant answer from a short list. Gap fill questions need you to choose one- or two-word answers from a list to complete a sentence. Some questions have boxes for you to show things like calculations or sketches. Other questions may have diagrams that you need to complete or use to answer a question. Short- and long-response questions are very common; short-response questions require concise and direct answers and are often worth 1–2 marks. Conversely, long-response questions require detailed explanations and are often worth 5–7 marks. There are many opportunities

throughout this Topic and others to practise the different types of question.

For questions 3–6, state whether it is a short-response question or long-response question and why. For each question, attempt an answer.

- ~~3~~ State **one** technique that can be used to protect indigenous communities in rainforests. [1]

22

- ~~4~~ Compare strategies and techniques for sustainably managing tropical rainforests. [4]

- ~~5~~ Discuss how rainforests can be managed sustainably. [7]

- ~~6~~ Give **one** strategy to sustainably manage rainforests. [1]

The digital part of this resource contains multiple-choice questions for each Topic, so you can practise this question type.

- ~~7~~ What things do you need to consider when answering a multiple-choice question?

REFLECTION

How did you identify which of the above were longer- and shorter-response questions? Did you look at command words and the number of marks available? These are both good techniques for determining the length of response to write.

UNDERSTAND THIS TERM

- Sustainable management

SELF-ASSESSMENT CHECKLIST

Let's revisit the knowledge focus and exam skills focus for this topic.

Decide how confident you are with each statement.

Now I can	Show it	Needs more work	Almost there	Confident to move on
Describe the characteristics of the Antarctic ecosystem	Describe the location, climate and features of the Antarctic ecosystem.			
Explain the threats to the Antarctic ecosystem and how these are managed	List three strategies and techniques for managing the Antarctic ecosystem.			
Describe the characteristics of the tropical rainforest ecosystem	Describe the location, climate and features of the tropical rainforest ecosystem.			
Explain the threats to	List three strategies and
