

5.2 The impacts of climate change at a range of geographic scales

1 Fill in the gaps with the correct words shown below.

food production sea levels extreme weather events

- a** Rising _____ are caused by melting ice caps and thermal expansion of the oceans.
- b** Increasing frequency of _____, such as hurricanes and heatwaves, indicate climate change.
- c** Changes in _____ may lead to food shortages.

2 What is thermal expansion?

3 Decide if the following statements are true or false:

- a** Some regions may experience stronger hurricanes and storms due to climate change.
- b** Climate change only has negative effects on food production.
- c** Rising temperatures can increase the spread of diseases such as malaria.

4 How might climate change contribute to an increase in climate refugees (people forced to leave their homes due to the impacts of climate change)?

UNDERSTAND THESE TERMS

- Drought
- Thermal expansion
- Climate refugee

When answering 'predict' questions that are not based on a source, such as a graph or photo, base your answer on your geographical knowledge and understanding. Make sure your prediction is realistic and clearly linked to what you know about the topic.

~~5~~ Predict **one** consequence of drought. [1]

~~6~~ Predict **one** consequence of increased ocean temperatures. [1]

~~7~~ Study Figure 5.3, a decile map which shows April to October rainfall between 2000 and 2021 in Australia. A decile map shows where rainfall is above average, average or below average for this period compared to all years from 1900. Predict the likely impacts of climate change for Australia. [4]

Climate change is a significant threat to Earth's ecosystems. See if you can answer the questions below from [Topic 3, 'Changing ecosystems'](#).

- a** What is meant by the climate of an area?
- b** What are the factors that influence the characteristics of the Antarctic climate?
- c** How has one threat to the Antarctic ecosystem been managed?
- d** What are the layers of the tropical rainforest ecosystem?
- e** Why is the tropical rainforest climate so hot and wet?
- f** What are three threats to the tropical rainforest ecosystem?
