

5.3 Responses to climate change

- 1 How do international agreements and targets help mitigate the impacts of climate change?
- 2 What role does carbon capture and storage (CCS) play in combatting climate change?
- 3 What are two ways to adapt to the impacts of climate change?
- 4 Why is relocating coastal communities not always the best option when it comes to reducing the impact of climate change?

« RECALL AND CONNECT 2 «

Climate change will make urban areas a challenging place to live, especially as the population of towns and cities continues to grow. See if you can answer the questions below from [Topic 7, 'Changing towns and cities'](#).

- a What is an unplanned settlement?
- b What is the difference between a brownfield site and a greenfield site?
- c What are the advantages of developing green spaces in urban areas?
- d What is urbanisation?

Your answer to an 'assess' question should be balanced, showing awareness of different viewpoints and the overall impact of the issue

you are evaluating. Before answering these questions, use a mark scheme to understand what a Level 3 response to a 7-mark question includes.

Make sure you explain your points clearly and remember to include both advantages and disadvantages for each question. Look in the mark scheme for the types of key terms that you need to use and remember to include specific examples. Use examples of mark schemes to help you plan your answer so you stay focused and write the correct amount.

~~5~~ Assess the role of electric cars in mitigating the impacts of climate change. [7]

~~6~~ Using examples you have studied, assess whether it is possible to adapt to the impacts of climate change. [7]

REFLECTION

What makes a good response to an 'assess' question? For example, a good response should look at both sides of the argument before coming to a conclusion and could include the use of facts and figures. How could you improve your answers to 'assess' questions?

SELF-ASSESSMENT CHECKLIST

Let's revisit the knowledge focus and exam skills focus for this topic.

Decide how confident you are with each statement.

Now I can	Show it	Needs more work	Almost there	Confident to move on
Outline the natural and human causes of climate change	Explain the natural and human causes of climate change.			
Explain the effects of climate change	Suggest three impacts resulting from climate change.			
Assess the strategies to manage the impacts of climate change	Evaluate changing agricultural practices to help adapt to the impact of climate change.			
Understand the command	Answer a 'predict' question confidently,			

Now I can	Show it	Needs more work	Almost there	Confident to move on
word 'predict'	such as 'Predict the likely impact on climate change of clearing large areas of forest to make agricultural land.'			
Understand the command word 'assess'	Answer an 'assess' question confidently, such as 'Assess whether it is possible to reach "net zero".'			
Work with mark scheme awareness	Explain the key differences between a Level 1, a Level 2 and a Level 3 response for 7-mark questions.
