

6 Population change

59

KNOWLEDGE FOCUS

You will answer questions on:

- 6.1 Populations grow and decline
- 6.2 Population structures change over time
- 6.3 The causes and impacts of international migration

EXAM SKILLS FOCUS

In this topic you will:

- show that you understand the command word 'calculate' and answer a 'calculate' question
- show that you understand the command word 'define' and answer a 'define' question.

The command word 'calculate' means to work out from given facts, figures or information. 'Calculate' questions test your geographical skills and skills of analysis. If appropriate, remember to include units in your answer after you have completed your calculation.

To 'define' means to give a precise meaning. 'Define' questions test your geographical knowledge with understanding. You should be able to provide a definition for any of the key terms found in the syllabus. Flashcards are an excellent revision tool for learning the definitions of key terms.
