

8.1 Measuring development

1 Match the following economic indicators of development, a–c to the correct definition, 1–3.

- | | | | |
|----------|------------------------------|----------|--|
| a | Gross National Product (GNP) | 1 | The total value of goods and services produced in a particular country in a year. |
| b | Gross Domestic Product (GDP) | 2 | The total value of goods and services produced in a particular country, plus income generated by its residents abroad in a year (it includes the income generated by citizens living abroad but excludes the income earned by foreign residents within the country). |
| c | Gross National Income (GNI) | 3 | The total income earned by a country's people and businesses wherever in the world it is earned. |

2 Identify the social indicators shown in Figures 8.1 and 8.2.

◀◀ **RECALL AND CONNECT 1** ▶▶

As countries develop, their rates of urbanisation usually increase. This is because employment opportunities are frequently located in towns and cities and so rural-urban migration takes place. See if you can answer these questions linked to [Topic 7](#), 'Changing towns and cities'.

- a** What is counter-urbanisation?
- b** Which type of country can be found at Stage 3 of the 'urbanisation pathway'?
- c** Which type of country is experiencing the fastest rates of urbanisation?

UNDERSTAND THESE TERMS

- Development
- Economic indicators
- Social indicators

72

When completing 'plot' questions, it is important to focus on accurately placing information on a map, graph, diagram or chart. These questions rarely require an explanation. Instead, you should ensure that each piece of information is plotted precisely and that it is visually clear.

-  On a copy of Figure 8.3, complete the graph by plotting the following information (see [Topic 8](#) in the Resource Sheets):

- Saudi Arabia = 94%

- Morocco = 69%

[2]

Figure 8.3: Literacy rates in different countries

4 On a copy of Figure 8.4, complete the graph by plotting the following information (see [Topic 8](#) in the Resource Sheets):

- 2012 = 61
- 2022 = 66

[2]

Figure 8.4: Life expectancy in Botswana

► **Image Description**

5 On a copy of Figure 8.5, complete the graph to show the following information about employment in Botswana (see [Topic 8](#) in the Resource Sheets):

- % employment in agriculture = 18
- % employment in industry = 66
- % employment in services = 16

[1]

Figure 8.5: Employment structures in different countries

On a copy of Figure 8.6, complete the map to show the following information:

- Sudan = 63.2% of people have access to electricity
- Ghana = 85.1% of people have access to electricity [2]

Figure 8.6: Access to electricity (% of population) in Africa

REFLECTION

Do you understand how 'plot' questions differ from other question types? In Questions 3–6, you practised accurately placing data

including plotting literacy rates on a bar chart, life expectancy on a line graph, employment structure on a triangular graph and electricity access on a map. These questions did not require explanations or interpretations, but rather clear and precise presentation of data.

Consider what kind of data could be displayed on maps, charts, graphs or diagrams, and think about the types of questions that you need to be able to answer.
